TakeltFree

- Purpose
 - Target users
 - Major features
- Implemented user stories

Purpose

the purpose of the app is to make it easier to people to help each other by donating household items.

Target Users

Individuals - looking to give away household items they no longer need .

community members seeking to acquire free items instead of purchasing new ones.

eco conscious users interested in reducing waste by reusing and recycling items

Major Features

users can create an account and log in to access to the platform features. users can upload details and photos of household items they want to give away. users can browse available items, add them in their cart and confirm bookings. bookers can view and use the contact information provided by uploaders to arrange the transfer if items. the app ensures that users provide necessary information such as photos for uploads and displays appropriate error messages when requirements are not met.

Implemented User Stories

users can register and log in to the app. the system provides error messages for issues such as weak password, used username or mismatched password during registration.

users are presented with options to either upload or book an item from the main interface, allowing them to easily navigate to the desired functionality. users who want to give away items can fill out an item upload form, including details and photos. the system requires at least one photo to proceed and displays an error message if its missing. users looking to acquire items can browse the listed items, add desired items to their cart and confirm the booking
